19 September 1983

STAT

MEMORANDUM FOR:

CO/ADSTAR

STAT

FROM:

Chief, Intelligence Systems Support Branch
Systems Support Division
Office of Data Processing

SUBJECT: Extension of Ragen Software Maintenance Contract
(83-B814800-000)

REFERENCE: Form 2420 requesting this extension, dated
28 June 83.

1. The ADSTAR System has been operational since January 1983. Ragen Information Systems delivered a Software Maintenance Proposal in February 1983. The contract was negotiated and signed in April 1983. Software Maintenance has been performed for six months and is a continuous activity with a current list of 48 tasks. Of these 48 tasks, 6 are complete, 3 have been dropped, 9 are active, and thirty are inactive.

2. A detailed list of these tasks is attached, and a list in priority sequence is also attached showing cost estimates for each task.

3. I am recommending per the best source justification on the attached copy of the Form 2420, an extension of this contract for one year to perform all of the High (H1-H19) and Medium (M1-M10) tasks for an estimated 2624 hours at an estimated cost of \$139,072.

STAT

4. If you have any questions or need any additional information, I can be reached on extension
